Profile

Personal Profile

I am a highly motivated Computer Science graduate from Kampala International University with a CGPA of 3.89 (Second Class Upper Division) and a strong passion for building innovative digital solutions. I specialize in JavaScript-based full-stack development, with practical experience using modern technologies such as React.js, Next.js, Node.js, Express.js, and NestJS to develop scalable web and mobile applications.

I have experience working with both private technology companies and national ICT institutions, including National Information Technology Authority Uganda, MSKITECH, and currently Archstrom Industries Ltd as a JavaScript Developer. Through these experiences, I have contributed to the development of business websites, e-commerce systems, and inventory management platforms.

I am passionate about problem solving, system design, and continuous learning. When faced with new challenges, I actively engage in research, experimentation, and self-learning to develop effective solutions. I work well both independently and within collaborative teams, and I approach technical problems using first-principles thinking, breaking complex issues into structured components to develop efficient and scalable solutions.

My goal is to leverage technology to build impactful digital systems, contribute to innovative engineering teams, and continuously grow as a software engineer in a global technology environment.

Education

O level Education St Henry's College Kitovu, Masaka Graduated with 23 aggregates	Jan 2011 - Nov 2016
A level Education Masaka Secondary School, Masaka Graduated with 10 points in Physics Mathematics and Arts	Jan 2016 - Nov 2017
Bachelor's degree of science in computer sciences Kampala International University, Kampala Graduated with 3.89 CGPA - Second class upper division	Aug 2022 - Apr 2025

Employment

Internship Position MSKITECH UGANDA, Kampala Software Developer / Web Developer MSKITECH During my time at MSKITECH, I worked on the development and maintenance of web-based solutions for businesses and organizations. My responsibilities included designing and building responsive websites and web applications using modern JavaScript technologies. I contributed to projects such as business websites, e-commerce platforms, and	Jan 2023 - Jul 2024

- Problem-Solver: Able to analyze complex issues and develop structured, effective solutions.

system-based applications, ensuring functionality, usability, and performance optimization. I also worked on backend logic using Node.js and Express.js, integrated databases, and collaborated with team members using GitHub for version control and project management.

Through this role, I strengthened my skills in problem solving, software architecture, and collaborative development, while delivering practical solutions that improved digital presence and operational efficiency for clients.

Graduate Trainee

Jan 2025 - Aug 2025

Nita-U Ministry of ICT, Kampala Lugogo

Graduate Trainee – Software Development National Information Technology Authority Uganda (NITA-U) During my graduate training at NITA-U, I gained practical experience in software development, system analysis, and digital infrastructure environments within Uganda’s national ICT regulatory body. I worked alongside experienced engineers and developers, contributing to the development, testing, and maintenance of web-based systems. My responsibilities included assisting in building and optimizing web applications, participating in code reviews, and applying modern development practices using JavaScript technologies and version control tools such as GitHub. I also contributed to debugging, testing system functionality, and improving application performance.

Through this experience, I strengthened my understanding of secure software development, collaborative development workflows, and real-world IT project implementation within government digital systems. The program also enhanced my problem-solving, teamwork, and professional communication skills, while exposing me to the importance of technology in national digital transformation and e-government services.

FrontEnd JavaScript Developer

Nov 2025 - Present

Archstrom Industries Ltd, Kampala

JavaScript Developer

Archstrom Industries Ltd

At Archstrom Industries Ltd, I work as a JavaScript Developer, contributing to the design and development of modern web applications and digital solutions for business operations. My role involves building scalable and responsive applications using JavaScript technologies such as React.js, Next.js, Node.js, Express.js, and NestJS.

I participate in the full software development lifecycle, from planning and system design to development, testing, deployment, and maintenance. I also integrate databases and APIs, optimize system performance, and ensure applications are secure and efficient.

In addition, I collaborate with cross-functional teams to translate business requirements into technical solutions, deploy applications to platforms such as Vercel, Railway, and Render, and maintain code quality using Git and GitHub version control systems.

This role has strengthened my experience in full-stack development, production deployment, debugging complex systems, and building scalable business applications.

Courses

Full-Stack JavaScript Development

Jan 2021

freeCodeCamp

Completed comprehensive training covering modern JavaScript development

I consent to the processing of my personal data for the purpose of recruitment for the position to which I am applying, in accordance with applicable data protection regulations.

- **Critical Thinker:** Approaches challenges using first-principles thinking and logical reasoning. Self-Motivated
- **Self-Motivated & Curious:** Continuously learns new technologies and frameworks to stay up-to-date.
- **Team Player:** Works well in collaborative environments and contributes to group success.
- **Independent Worker:** Capable of taking ownership of projects and delivering results autonomously.
- **Adaptable & Resilient:** Embraces challenges and adapts quickly to new tools, environments, and requirements.
- **Detail-Oriented:** Ensures high-quality code, clean architecture, and reliable software solutions.
- **Effective Communicator:** Explains technical concepts clearly to both technical and non-technical stakeholders.

including React.js, Node.js, Express.js, APIs, and full-stack application development. The course focused on building real-world projects and understanding modern web architecture.	
React.js and Modern Frontend Development Edureka Studied component-based frontend development using React.js, state management, hooks, and best practices for building responsive and scalable web applications.	Jun 2021
JavaScript Programming and Web Development Foundations CodeBro Strengthened core programming concepts including JavaScript fundamentals, DOM manipulation, asynchronous programming, and web application logic	May 2023
Git and Version Control for Developers freeCodeCamp freeCodeCamp Training in version control using Git and GitHub, collaborative development workflows, and maintaining structured code repositories for software projects	Jul 2022
Next.js – Full-Stack React Framework Development freeCodeCamp / Edureka Completed training focused on building production-ready web applications using Next.js, including server-side rendering (SSR), static site generation (SSG), API routes, routing systems, and performance optimization. Applied these skills to develop scalable and SEO-optimized web applications deployed to cloud platforms such as Vercel.	Sep 2024
Next.js – Full-Stack React Framework Development Training focused on building scalable web applications using Next.js, including server-side rendering (SSR), static site generation (SSG), API routes, routing systems, and application performance optimization. Applied these concepts in developing production-ready applications deployed to cloud platforms such as Vercel.	Present
Backend Development with NestJS (Node.js Framework) Completed training in NestJS, a progressive Node.js framework for building efficient and scalable server-side applications. Covered concepts such as modular architecture, dependency injection, RESTful APIs, authentication, middleware, and database integration for enterprise-grade backend systems.	Present
JavaScript Programming and Web Development Foundations Strengthened core JavaScript programming skills including asynchronous programming, DOM manipulation, event handling, and application logic, forming a strong foundation for modern web development.	Present

Achievements

- Developed and maintained responsive web applications using modern JavaScript frameworks, enhancing user experience and client satisfaction.
- Implemented backend services and APIs with Node.js and Express.js, improving application performance and scalability.
- Collaborated with cross-functional teams using GitHub for version control, ensuring efficient project management and code quality.
- Optimized database integration and queries to support dynamic web

I consent to the processing of my personal data for the purpose of recruitment for the position to which I am applying, in accordance with applicable data protection regulations.

functionalities, resulting in faster data retrieval and processing.

- Contributed to digital transformation projects within a national ICT regulatory body, supporting e-government services and enhancing national IT infrastructure.
- Contributed to the development of e-commerce platforms by integrating secure payment gateways and optimizing front-end performance, resulting in a 25% increase in user transactions.
- Led debugging and testing efforts for web applications, identifying and resolving critical issues that improved application uptime and reliability for end-users.
- Collaborated with senior developers at National Information Technology Authority Uganda to enhance security protocols in web applications, reducing vulnerabilities by 30%.
- Designed and implemented a modular web application framework during internship at MSKITECH, which increased development efficiency by 20%.
